

# CMX1 + mojix

## End-to-end traceability & food safety for FSMA 204

Driving compliance with the FDA's Food Safety Modernization Act (FSMA 204)

A comprehensive solution for ongoing supplier, food quality, & safety management with granular traceability for when issues arise.

### Purpose-built FSMA partnership includes:

#### CMX1 ONBOARDING & COMPLIANCE MANAGEMENT

- Provides supplier location & product SKU/ GTIN master data
- Ensures traceability event data is provided in accepted format
- Provides tools to validate supplier is within traceability compliance
- Data reporting based on supplier & product tracking and location

#### mojix REAL-TIME, ITEM-LEVEL VISIBILITY SOLUTIONS

- Enterprise-system integration through API
- Medium-sized enterprise support through flat file & EDI support
- Small-supplier support with form-based data entry for harvest transform & shipping/receiving updates

CMX1's platform allows customers to manage product quality and food safety, providing brands the opportunity to **improve responsiveness, ensure customer safety, and mitigate risk** when resolving product-related incidents and executing product recalls.

The Mojix SaaS-based solution enables the tracing of Key Data Elements (KDEs) and Critical Tracking Events (CTEs) along the supply chain in real time, allowing item-level and lot code traceability when outbreaks of foodborne illness or recalls arise. This level of traceability complies with FMSA 204 and facilitates **fail-proof quality control via the systematic review of origin, destination and freshness at each stage of the supply chain.**

## Better together

Mojix & CMX1 provide brands the combined power of:

- Open data access and item-level traceability from Mojix empowers staff for swift action
- CMX1's single platform management improves responsiveness, ensures customer safety, and mitigates risk when resolving incidents & recalls

You have high standards.  
So do we. Let's talk.
